PROJECT CHECKPOINT FOR POINTS ON RUBRIC / QUIZ SCORE
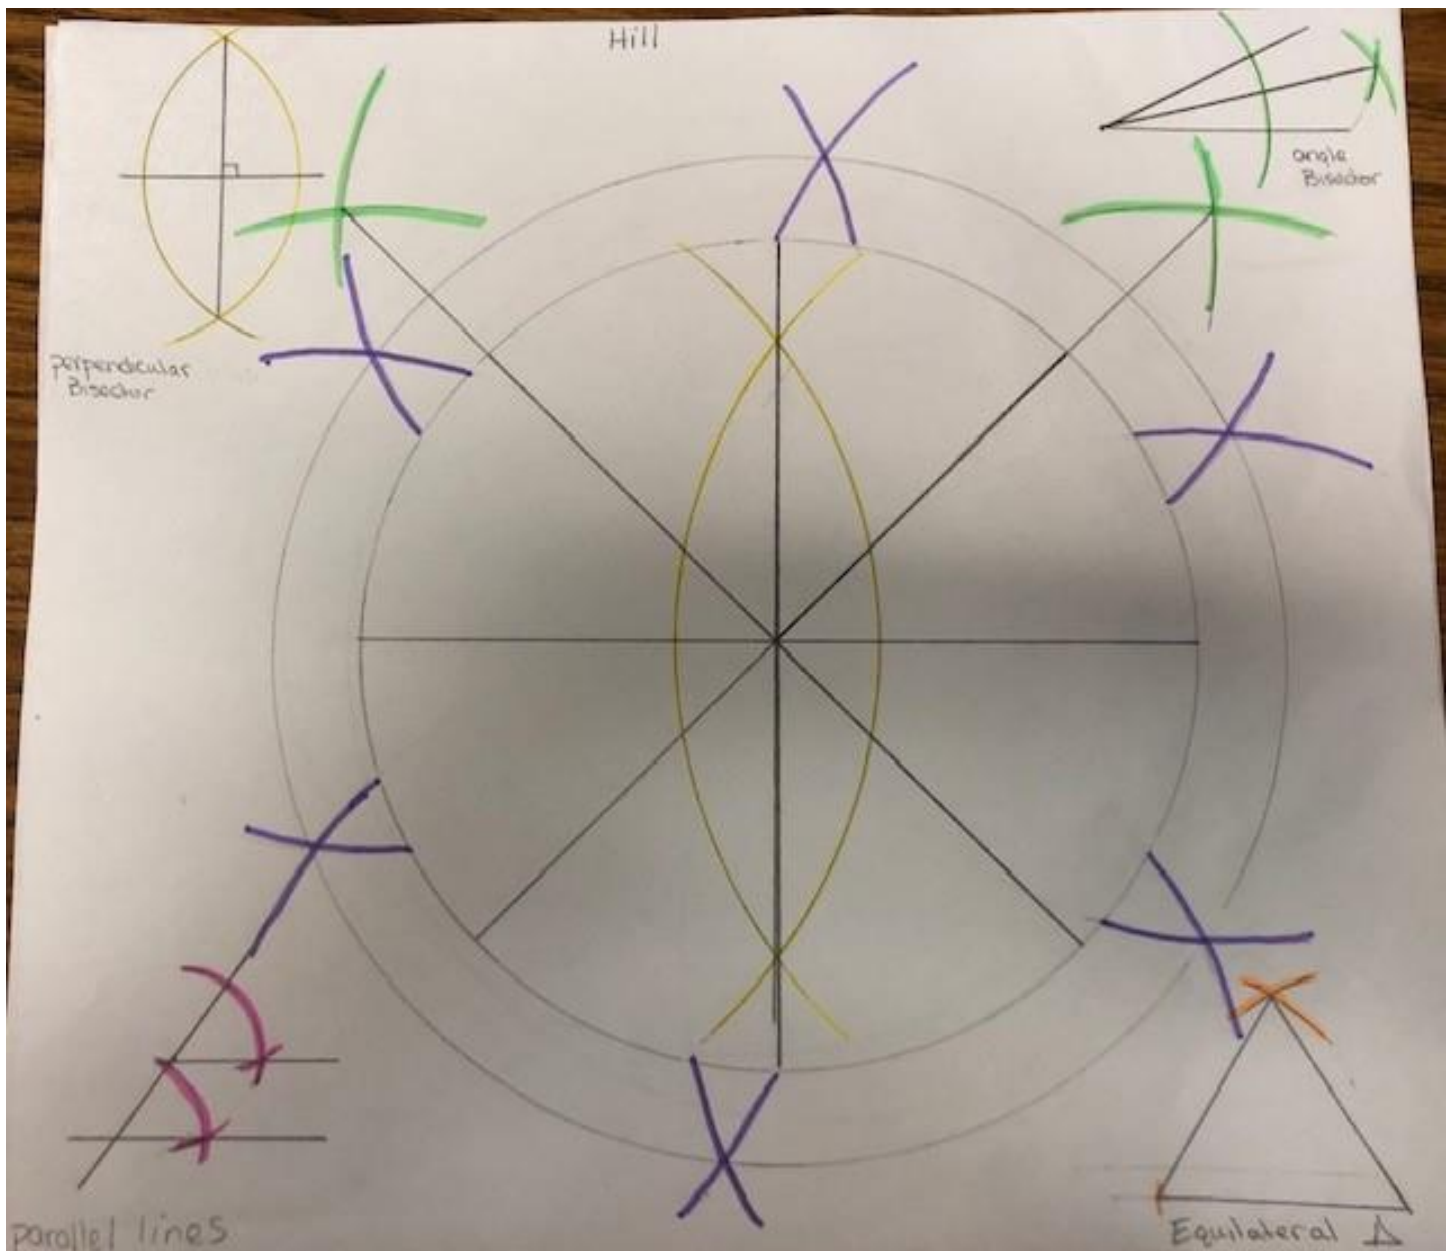

This should all be on your actual project (not a practice paper)

Step 1:   Complete the daisy "Checking for precision work"
                   (all intersections <u>on</u> the circle)

Step 2:   Draw inner circle (min 3.5" radius), then erase inner daisy. Then   construct diameter, perpendicular bisector, and lastly the angle bisectors.

Step 3:   Make all corner constructions

Leave ALL construction marks for checkpoint grade.

Have teacher check work and assign a score for quiz and rubric !!!

Highlighter is just to show you what I am looking for- do not highlight yours!
